出版时间:2007-11

装帧:HRD

isbn:9780387469140

This Manual accompanies the Textbook, teaching radioanalytical chemistry to seniors and graduate students. The manual can be used in conjunction with the textbook to teach a 3-hour lecture course and a 6-hour laboratory. The experiments address a range of practical aspects in the radiochemistry laboratory: use of laboratory and radiation detection equipment, performing specific analyses for radio-iodine, radio-strontium, uranium, and plutonium.
