著者:Boulabiar, Karim 编

出版者:Springer Verlag

出版时间:

装帧:HRD

isbn:9783764384777

This book contains nine well-organized survey articles by leading researchers in positivity, with a strong emphasis on functional analysis. It provides insight into the structure of classical spaces of continuous functions, f-algebras, and integral operators, but also contains contributions to modern topics like vector measures, operator spaces, ordered tensor products, non-commutative Banach function spaces, and frames. Contributors: B. Banerjee, D.P. Blecher, K. Boulabiar, Q. Bu, G. Buskes, G.P. Curbera, M. Henriksen, A.G. Kusraev, J. MartA--nez, B. de Pagter, W.J. Ricker, A.R. Schep, A. Triki, A.W. Wickstead
