出版者:Elsevier Science Ltd

出版时间:2007-4

装帧:HRD

isbn:9780444528780

This third volume in the series represents the Proceedings of the 3rd International Nanophotonics Symposium, July 6-8, 2006, Icho-Kaikan, Osaka University, Osaka, Japan. Over a two-day symposium, distinguished scientists from around the world convened to discuss the latest progress in this field and the conclusions have been summarised in "Nano Biophotonics: Science and Technology". The contents of this book have been compiled by invited lecturers, research members of the relevant projects/program, and some of general participants. The book has 27 chapters which are classified into 4 parts; nano bio-spectroscopy, nano bio-dynamics, nano bio-processing, and nano bio-devices. It bridges the gap between conventional photophysics and photochemistry and nanoscience. It is continuing the series that focuses on 'hot' areas of photochemistry, optics, material science and bioscience.
