著者:Clement, Gregory T. (EDT)/ McDannold, Nathan J. (EDT)/ Hynynen, Kullervo (EDT)

出版者:Springer Verlag

出版时间:2006-6

装帧:HRD

isbn:9780735403215

All manuscripts were peer-reviewed. This book contains the papers from the 5th International Symposium on Therapeutic Ultrasound, the only international meeting dedicated solely to this area. The meeting covers topics ranging from basic biological and physical research to clinical application. Specific topics included are: basic principles of therapeutic ultrasound; ultrasound bioeffects; monitoring and treatment planning; brain; cavitation and bubbles; devices; animal studies; clinical studies; drug delivery and in vitro studies; as well as quality assurance.
