isbn: 9781418009427

The best way to reduce firefighter injuries and deaths at incidents is the appointment of a well-prepared proactive Incident Safety Officer (ISO). This book primes aspiring and current Safety Officers to meet and exceed the specific job functions outlined in the 2007 Edition of NFPA 1521: Standard for Fire Department Safety Officer, as well as to

aggressively pursue the operation of a highly efficient safety program. Extensively revised, the second edition of Fire Department Incident Safety Officer incorporates topics specifically focused on further developing and improving existing safety programs. Fundamental coverage of job functions for successful handling of incidents involving hazardous materials, technical rescue, wildland fire, and other disasters is accompanied by explanations of the critical skills required to be a proficient Safety Officer, including the processes of reading smoke, anticipating risk, predicting building collapse, and improving firefighter rehabilitation.
