出版时间:2007-03-27

装帧:Hardcover

isbn:9781402051944

The main theme of this anthology is the unique interaction between mathematics, physics and philosophy during the beginning of the 20th century. In this book, ten renowned philosopher-historians probe insightfully into key conceptual questions of pre-quantum mathematical physics. The result is a diverse yet thematically focused compilation of first class papers on mathematics, physics and philosophy, and a source-book on the interaction between them.

作者介绍:

Vincent F. Hendricks is Professor of Formal Philosophy at Roskilde University, Denmark. He is the author of many books, including *The Convergence of Scientific Knowledge*, *Thought 2 Talk* and *Formal Philosophy*. Editor in Chief of *Synthese* and *Synthese Library*, he is also the founder of OLOG, The Network for Philosophical Logic and its Applications.
