

The Statistical Analysis of Interval-censored Failure Time Data

[The Statistical Analysis of Interval-censored Failure Time Data_ 下载链接1](#)

著者:Sun, Jianguo

出版者:Springer Verlag

出版时间:2006-6

装帧:HRD

isbn:9780387329055

This book collects and unifies statistical models and methods that have been proposed for analyzing interval-censored failure time data. It provides the first comprehensive coverage of the topic of interval-censored data and complements the books on right-censored data. The focus of the book is on nonparametric and semiparametric inferences, but it also describes parametric and imputation approaches. This book provides an up-to-date reference for people who are conducting research on the analysis of interval-censored failure time data as well as for those who need to analyze interval-censored data to answer substantive questions.
