"Moving Mars" is a story of human courage and love set within the greater saga of a planetary liberation movement. Mars is a colonial world, governed by corporate interests on Earth. The citizens of Mars are hardworking, but held back by their lack of access to the best education, and the desire of the Earthly powers to keep the best new inventions for themselves. The young Martians -- the second and third generations born on Mars -- have little loyalty to Earth, and a strong belief that their planet can be independent. The revolution begins slowly, but will grow in power over decades of political struggle until it becomes irresistible. Told through the eyes of an extraordinary character, Casseia Majumdar, a daughter of one of Mars' oldest, most conservative Binding Multiples, "Moving Mars" is Greg Bear's brilliant conception of the human colonization of the red planet, with lovingly painted details and a grand historical

sweep, embellishing an audacious scientific speculation.

细节真实到近乎科普图书，冲突安排的也够大气，很多壮观和美好的图景。里边的爱情故事太狗血。我翻译了中文，可能快要出版了。

书评

《天使女王》、《永世》还没看，先看这本，也是读的格雷格·贝尔科幻著作的第一本。有些小说，无论虚拟还是非虚拟，喜欢婆婆妈妈、啰啰嗦嗦，这本也是。乘着飞船，从火星到地球，几天时间作者可以写上整整四十多页，再加上女主在地球的这段时间，占了整本书的四分之一。所以...
