This fast-paced thriller of planetary terrors and world annihilation introduces The Global Frequency, an independent defense intelligence organization that secretly defuses the lingering threats and dormant experiments of the 20th century. Unknown to the world at large, this secret society of 1,001 specialty sleeper agents is called upon to prevent the impending threats of Armageddon that were created by careless governments and immoral scientists over the last century. In this hard-hitting first volume, various expert operatives are sent on desperate individual missions to thwart an alien virus invasion, destroy a nuclear-powered cyborg, and deactivate a hidden Ebola bomb.
