America is a police state, and it is about to be threatened by the most hellish enemy in the world: insects. When the Agency discovered that Dr. Hellstrom's Project 40 was a cover for a secret laboratory, a special team of agents was immediately dispatched to

discover its true purpose and its weaknesses--it could not be allowed to continue. What they discovered was a nightmare more horrific and hideous than even "their" paranoid government minds could devise. First published in "Galaxy" magazine in 1973 as "Project 40," Frank Herbert's vivid imagination and brilliant view of nature and ecology have never been more evident than in this classic of science fiction. Frank Herbert is the author of the 1965 science fiction classic, "Dune." He passed away in 1986.
