Long out of print, The Sand Wars is Charles Ingrid's classic saga of military science fiction. This special omnibus edition includes the first three books of the series-Solar Kill, Lasertown Blues, and Celestial Hit List-together for the first time.

Jack Storm was one of the last Knights-a soldier abandoned by his own people to fight a battle he couldn't possibly win. His only defense: a suit of armor that has been altered by his alien enemies...armor that could, if worn too long, transform him into an inhuman killing machine....

But Jack Storm is not a machine. He is a man-on a one-man crusade of vengeance....
