著者:Clifford A. Pickover

出版者:Basic Books

出版时间:1999-11-26

装帧:Paperback

isbn:9780465073153

Out-of-this-world speculation on extraterrestrial life that will fascinate fans of Star Trek, The X-Files, and sci-fi of all kinds. "Run, leap, scurry and scoot to your nearest bookstore and get [Pickover's] books." -Byte "Bucky Fuller thought big, Arthur C. Clarke thinks big, but Cliff Pickover outdoes them both." -WIRED "Pickover inspires a new generation of Da Vincis to build unknown flying machines and create new Mona Lisas." -Christian Science Monitor If extraterrestrials ever landed on earth, they would find us

extremely strange. Their first intimation of our existence might well be a presidential speech or the Olympic Games, a mud-wrestling match or Third Rock from the Sun. What would aliens look like? An intelligent octopus-like creature is certainly plausible. What about odd numbers of limbs-a three-legged alien with three arms and three eyes? Could creatures live at extremely high pressures and temperatures? Would they have any interest in abducting us? Would they want to have sex with us? In classic Pickover style, here is scientifically based speculation at the far edge of knowledge-and beyond.
