If you or your child has bipolar disorder

this is the book for you!

The DaVinci Method is designed to help people with bipolar disorder work the strengths and minimize the weaknesses associated with bipolar disorder. While other therapies try to force those with bipolar disorder to behave more like "normal" people, this therapy recognizes the genius behind bipolar disorder and helps you harness and balance it.

Why should someone with bipolar disorder struggle to be like a "normal" 9-to-5 office worker, when they are genetically predisposed to be successful as entrepreneurs, leaders, inventors, pioneers, athletes and artists?

The DaVinci Method is over 260 pages of the most useful therapy ever designed for helping creative bipolar disorder-ers be more productive. bipolar disorder-ers don't need to learn how to sit still and focus on details, because hyperfocus is a natural asset of bipolar disorder when it's aroused. What bipolar disorder-ers need to learn is how to evoke and manage the passion that elicits hyperfocus.

If you or your child are gifted enough to have the bipolar gene, then all you need to do is learn how to work with it.

Don't waste another day being depressed or frustrated ...
