Now more than ever, nursing is one of the fastest rising careers in the United States. In this time of economic uncertainty, employment in the health care industry is projected to increase 26 percent in the next few years. Of this group, registered nurses are listed as one of the top twenty-five occupations with the fastest growth, high pay, and low unemployment. "So You Want to be a Nurse reveals everything that college nursing majors or anyone interested in becoming a health care professional will ever need to know about the nursing profession. Readers will learn how to get the right position for themselves and what they will be facing when they obtain their first nursing position. They will learn how to survive in a hospital once they get that position and how to deal with administrators, physicians, technicians, colleagues, patients and their families.
