In *The New Americans*, Michael Barone, senior writer at U.S. News & World Report, says that now, more than ever, the melting pot must be used to keep America great. Barone attacks multiculturalism and anti-American apologists--but he also rejects proposals for building a wall to keep immigrants out, or rounding up millions of illegals to send back home. Rather, the melting pot must be allowed to work (as it has for centuries) to teach new Americans the values, history, and unique spirit of America so they, too, can enjoy the American dream.
