isbn:9780202309606

This is the first book to appear which correlates within a single volume the relevant data for both archeological and geological dating of human fossil remains. The author was trained both as a geologist and as a prehistorian, and has written this book first to meet the needs of archeologists wishing to learn the stratigraphical frameworks now applied to Quaternary deposits, and second to meet the needs of geologists requiring to know the terminology of Paleolithic and Mesolithic cultures.
