isbn:9780739121580

Unpacking Globalization examines the experiences of people living with the forces that are transforming economic systems, culture, gender relationships and governance. The book offers interdisciplinary analysis of the well-being of women and men as they cope with the changes of globalization. Through theory, case studies, and data, several themes emerge indicating that from the household to the continental level, change is leading to new awareness and new survival strategies for both women and men. The contributors to the volume come from Africa, Asia, Europe, and North and South America. They present analysis of global changes and historical background from diverse perspectives and offer case studies on social security, gender, and macroeconomy. They employ feminist theory as well as detail the experiences of current and future women entrepreneurs. An exciting interdisciplinary text, Unpacking Globalization can supplement women's studies, anthropology, sociology, and economic development courses.
