isbn:9780813027012

Stemming from an international conference held in Utrecht, this collection encompasses the political, economic, social, and legal aspects of the illegal drug industry. The introduction provides an overview of the political economy of the drug industry followed by discussions of the impact of the drug industry on the Latin American source countries; drug trafficking and money laundering; the war on drugs, transnational crime, and international security; and current options for intervention and control.
