装帧:Paperback

isbn:9780202309040

In this book, Hans Kummer, one of the world's leading primate ethologists, examines the patterns of social interaction among primates. He examines this social behavior from the fundamentally biological viewpoint of evolutionary adaptation as part of the survival mechanisms for the species. Recognizing that all activity is constituted in part of genetic programming and in part of adaptive behavior, he explores the borderline area between the genetic and the "cultural." By use of astute observation and clever experimentation, he shows that many aspects of social behavior are inherited, and differentially inherited among various primate groups.

作者介绍:

Hans Kummer earned his Ph.D. in zoology from the University of Zurich.
