Since the U.N.'s World Conference on Women in Mexico City in 1975, feminists around the world have campaigned with increasing success for recognition of women's full personhood and empowerment. "Global Feminism" explores the social and political developments that have energized this movement. Drawn from an international group of scholars and activists, the authors of these original essays assess both the opportunities that transnationalism has created and the tensions it has inadvertently fostered. By focusing on both the local and global struggles of today's feminist activists, this important volume reveals much about women's changing rights, treatment and impact in the global world.
