Combining data from the 2001 Census of Population and other official sources, " Focus on People and Migration" covers the UK and its population, including the age structure of the population, fertility and mortality, analyses of where people live, movements

within the United Kingdom and international migration. The demographic characteristics of overseas-born and special populations such as armed forces, prisoners and students are examined. Lastly, the report presents profiles for ten major cities and towns in the UK and comparisons of UK demographic patterns with those of other European and North American countries.
