出版时间:2008-12-31

装帧:Paperback

isbn:9780415946810

Here the authors of this landmark book challenge the assumption that race is declining in its significance as indicator of economic, political and social conditions. "Anything But Racism" sets the record straight by providing a comprehensive approach to understanding race and research, including areas such as: social theory, survey research, ethnography, demography, statistics and finding results.
