From Booklist

Taking a feminist perspective on a subject encumbered by the ponderous weight of societal mores and cultural expectations, Avakian's collection illustrates how meal preparation remains a meaningful expression of emotional connections and a creative way to communicate. In stories, essays, and recipes, women reminisce about food to reveal a myriad of highly charged meanings. Personal reflections illustrate the metaphorical warmth a kitchen environment generates, strengthening familial ties. In other instances, the culinary mode is shown to be rejected, releasing precious energy for writing or other artistic outlets. Representing well-known as well as emerging writers, this wide-ranging collection delineates just how food sustains ties that bind and provides satisfying reminders of the choices women have today. Alice Joyce
