The prehistory and early history of northern societies -- from the Palaeo-eskimo pioneers to the Viking Norse Settlers -- is unfolding through archaeological and historical research and through interdisciplinary studies including natural sciences. The more insight we have gained on Arctic and North Atlantic archae-ology the more we have realised how diverse and dynamic these societies were and how complex their stories are. This volume includes articles on New approaches to dynamic analysis of Palaeo-Eskimo artefacts; Interaction with the environ-ment; Dynamics of small scale societies; Archi-tecture and social organisation of space in Palaeo-Eskimo and Inuit contexts; Origins and spread of the Palaeo-Eskimo and Inuit cultures; Demography, death and burials; Norse culture in Iceland and the Faroe Islands, e.g. outlaws of Viking Age Iceland; Trade and burials in Viking Age Britain.
