

Understanding Regression Analysis

[Understanding Regression Analysis_下载链接1](#)

著者:Larry Schroeder

出版者:Sage Publications, Inc

出版时间:1986-4-1

装帧:Paperback

isbn:9780803927582

The authors have provided beginners with a background to the frequently-used technique of linear regression. It is not intended to be a substitute for a course or textbook in statistics, but rather as a stop-gap for students who encounter empirical work before undertaking a statistics course. It provides a heuristic explanation of the procedures and terms used in regression analysis and has been written at the most elementary level.

评论

线性回归与假设检验

言简意赅小绿书

a good introduction to linear regression. Pretty clear about many concepts.

书评

写的不错，言简意赅，公式推导比较弱，但是用来入门，还是有助于厘清一些基本概念框架的。这里有，电子版，直接看咯
