The essays in this collection work toward a larger goal of separating "globalization" from strictly economic considerations. Each chapter looks at how globalization affects the individual and surrounding culture, rather than looking at the political or economic effects. The contributing scholars come from Sociology, American Studies, Ethnic Studies, Asian American Studies and Black Studies department, which should mean that the book has a wide audience. The essays in this collection work toward a larger goal of separating 'globalization' from strictly economic considerations. The authors instead look at globalization as a force that produces profound social and cultural consequences, including migration, struggles for social change, and the transformations of aesthetic practices.
