评论

Van Schendel is so right in pointing out that academic institutions are as equally responsible as political ones for carving up the globe into big patches (for the sake of making things easier perhaps). Zomia is charming in his texts. It becomes even more so in Scott's work because I don't resist you anymore, not even by foot-lagging and so. I run.

-----  
有朝一日写syllabus的话van Schendel这一篇要必读
