isbn:9780534543914

This text presents both the quantitative and qualitative methods and focuses on teaching students how to skillfully apply the full range of research designs, methods and strategies to evaluation of social work in all domains of social work practice. The book provides a framework for the integration of systematic inquiry with practice that can be used by all social workers. The authors have created a model called, "evaluation practice" that provides the evidence-based structure within which diverse social work theories and skills can be organized, examined and verified.
