After a long day at work or a lazy afternoon at home, many of us seek solace and distraction in a place where the magical combination of comfort, familiarity, and good company transform an ordinary hangout into our special "third place." In his landmark work, *The Great Good Place*, Ray Oldenburg identified, portrayed, and promoted those third places. Now the time has come to celebrate the many third places that dot the American landscape and foster civic life. *Celebrating the Third Place* brings together nineteen firsthand accounts by proprietors of third places, as well as appreciations by fans who have made spending time at these establishments a regular part of their lives. The scope of places profiled—from an historic tavern in Washington, D.C., and a garden shop in Massachusetts to a coffeehouse in North Carolina and a bookstore in Michigan—make *Celebrating the Third Place* a must-read for everyone who has or wants a third place they can call their own.
