isbn:9780789001375

Replete with numerous diagrams, charts, tables, and exercises, the second edition of *Social Work Practice: A Systems Approach* brings alive the systems model of social work practice. Learning systems analysis will lead you to a more dynamic view of reality. With this book as a guide, you are sure to give your social work practice the overhaul it needs. This user-friendly text will allow you to integrate micro and macro modes of intervention, sensitize your practice, enhance your conflict resolution skills, and analyze system-environment structures and currents. The basis for popular ecological models in current social work literature, the systems model can be used to understand social change, to plan or direct social change, and to analyze environmental impacts on human growth and behavior. As *Social Work Practice: A Systems Approach* explains, the systems model is appropriate for international social work because it is applicable across cultural and societal boundaries. This book provides you with specific system-based intervention steps, descriptions of problem situations, and an understanding of practice theory for your social work practice. A key resource for educators, students, and practitioners, it discusses: creating an effective network of social services; the implications of ecological theory for social work practice; eco-mappings; systems-oriented concepts in the social sciences and social work; the individual person as a system; managing social change and conflict.

processesgleaning effective strategies from existing practice modelsWith its outline of a one-semester master's level course in systems analysis and its discussion of the 20th-century paradigm shift from reductionism to wholeness, Social Work Practice: A Systems Approach will be a great asset to social workers both within and beyond the classroom. Those in other helping professions, such as education, psychology, and organization development, will also find this book vital to understanding the changes experienced during the last 30 years. You will discover how many systems-based professional social work roles and strategies are compatible with existing models.
