The current conception of the absolute chronology of the Italian Copper Age to the

end of the Early Iron Age is set out in this new title from the British Museum. Some 850 objects have been arranged chronologically from the Copper Age, through the Bronze Age, to the Early Iron Age. Within these headings, the objects are organised typologically e.g. axes, swords etc. A major result of this study has been the reassembly of several groups of bronzes probably originally from hoards. Each entry includes a description, bibliography and comparanda, and line drawing or photograph.
