著者:Butler, Tim/ Watt, Paul

出版者:Sage Pubns

出版时间:2007-1

装帧:HRD

isbn:9780761963691

This is a book that should be read by anyone interested in class, inequality, poverty and politics. Actually, probably more importantly it should be read by people who think that those things do not matter! It provides a wonderful summation of the huge

amount of work on these topics that now exists and it also offers its own distinctive perspectives on a set of issues that are - despite the claims of some influential commentators - still central to the sociological enterprise and, indeed to political life." Roger Burrows, University of York With theoretical ease and the use of telling examples, Butler and Watt offer a clear and compelling analysis of the dynamics of social and spatial inequality in an era of globalisation. This is an invaluable resource for students and scholars in sociology, human geography and the social sciences more generally. Gary Bridge, University of Bristol With the declining attention paid to social class in sociology, how can we analyze continuing and pervasive socio-economic inequality? What is the impact of recent developments in sociology on how we should understand disadvantage? Moving beyond the traditional dichotomies of social theory, this book brings the study of social stratification and inequality into the 21st century. Starting with the widely agreed 'fact' that the world is becoming more unequal, this book brings together the 'identity of displacement' in sociology and the 'spaces of flow' of geography to argue that show how place has become an increasingly important focus for understanding new trends in social inequality
