The central concern of this book is place identity, and its representation and manipulation through planning. Place identity is of growing international concern, both in planning practice and in academic work. The issue is important to practitioners because of the impact of globalisation on notions of place. This book includes comparisons between Norway, the Netherlands, Sweden and Scotland, focusing strongly on the question of how different spatial planning systems and practices are currently conceiving and affecting issues of place identity.

哎，就Identity的概念或许还能用上。其它都在说参与式规划，在中国，这就是一个说辞背书而已，用来制造合理性空间和开拓市场。
