出版者:Dufour Editions

出版时间:2004-10

装帧:HRD

isbn:9780861404513

First published in 1960, this work covers a lifetime of fishing in Ireland for trout, sea trout (white trout) and salmon. Although it is often reminiscent, every incident aims to teach something of value. For this second edition the author revised the book, added two more chapters, on lost Irish fish and on Delphi, and an appendix on the effects of waves and deeply stained water on a fish's vision of a fly.
