出版者:Human Kinetics

出版时间:2005-11

装帧:Pap

isbn:9780736054539

Reference for teachers of physical education and coaches. This work provides a brief overview of tactical games teaching for those not familiar with the approach. It features practical lesson plans for a variety of sports, including soccer, basketball, volleyball,

badminton and tennis, and focuses on a student centred teaching and learning method, helping players and students identify their practice needs and apply the tactical approach for themselves. A DVD shows how the authors implement the tactical games approach in lessons representing a cross section of the sports and lesson plans.
