A funny and affectionate portrayal of the author's home town. Combining tourist information with history, humor, and anecdote, this is a book that will appeal to golfer and non-golfer, local and visitor, alike. It features a detailed map of the course and low down from a regular St. Andrews player. The book also contains an informative guide to the attractions of the town, the best places to stay and eat. It will even persuade the most jaded golf widow or widower that the town is worth a visit.
