For about \$150 anyone can access the United States' multi-billion dollar GPS program. *Using GPS Units: A Practical Guide for Hikers, Bikers, Paddlers, and Climbers* shows readers how to plug in and enhance most any outdoor experience. Whether a hiker on a weekend trip through the Great Smokies, a backpacker cruising the Continental Divide Trail, a mountain biker kicking up dust in Moab, a paddler running the Lewis and Clark bicentennial route, or a climber pre-scouting the routes up Mount Shasta, a simple handheld GPS unit is fun, useful, and can even be a lifesaver.

Described in conjunction with today's most popular GPS software, easy to understand information enables readers to:

- >Plan a trip
- >Navigate along a route
- >Gather data from the outing
- >Analyze trip data after the trip

Information is power, and a GPS unit is today's preferred tool to harness the power of navigational technology for a more enjoyable, more informative, and possibly safer outdoor experience.
