The entire process of conducting research in high school and college, whether independently or through a research institution, is broken down into easy steps in this student resource. Topics covered include finding a lab, publishing results, and ultimately getting into a choice college using research experience. Students will find a complete list of research scholarships, internships, and competitions--peppered throughout with a coach's synopsis, insider tips from top winners, detailed information on science and technical colleges, and extensive case studies. A truly invaluable resource, this book's straightforward advice on how to write a research paper and guidance from top scientists will undoubtedly aid students with the most prestigious research competitions.
