About Research and Education Association

Research and Education Association (REA) is an organization of educators, scientists, and engineers specializing in various academic fields. Founded in 1959 with the purpose of disseminating the most recently developed scientific information to groups in industry, government, high schools, and universities, REA has since become a successful and highly respected publisher of study aids, test preps, handbooks, and reference works. REA's Test Preparation series includes study guides for all academic levels in almost all disciplines. Research and Education Association publishes test preps for students who have not yet completed high school, as well as high school students preparing to enter college. Students from countries around the world seeking to attend college in the United States will find the assistance they need in REA's publications. For college students seeking advanced degrees, REA publishes test preps for many major graduate school admission examinations in a wide variety of disciplines, including engineering, law, and medicine. Students at every level, in every field, with every ambition can find what they are looking for among REA's publications. While most test preparation books present practice tests that bear little resemblance to the actual exams, REA's series presents tests that accurately depict the official exams in both degree of difficulty and types of questions. REA's practice tests are always based upon the most recently administered exams, and include every type of question that can be expected on the actual exams. REA's publications and educational materials are highly regarded and continually receive an unprecedented amount of praise from professionals, instructors, librarians, parents, and students. Our authors are as diverse as the fields represented in the books we publish. They are well-known in their respective disciplines and serve on the faculties of prestigious high schools, colleges, and

universities throughout the United States and Canada. Chapter 1: INTRODUCTION  
ABOUT THIS BOOK This book provides you with an accurate and complete representation of the Tests of General Educational Development (GED). REA's three full-length practice tests are based on the latest editions of the GED tests, which were overhauled for 2002. Our topical reviews and drills are designed to prepare you for the very kind of material you will see when taking the actual test. You are allowed 7 hours and 5 minutes to complete each of our sample tests. That's the same amount of time you will be given during the actual exam. (Don't panic! The actual exam is usually administered during two or three sittings over a period of two days. Check with your state's department of education for information on GED test centers, test times, and test dates.) Our sample tests have been carefully calibrated to match the GED's level of difficulty, format, and content. Following each model test you will find an answer key along with detailed explanations designed to help you master the material and score high.
