著者:Lintern, Fiona/ Stapleton, Merv/ Williams, Lynne

出版者:Trans-Atlantic Pubns

出版时间:2004-10

装帧:Pap

isbn:9780340816264

Our authors have gone through all the original research articles so you don't have to! "Study Guide for OCR Psychology: A2 Level" is the essential guide to evaluating research evidence in the key studies. It provides all the information you need, including

details of the sample, method and procedure used, for studies in each of the six A2 option units: Crime, Health, Sport, Environment, Education and Organizations. It shows you how to evaluate the research, and also provides tips on top exam technique. Every unit has short summaries of the key research articles, each of which is discussed in relation to a number of key themes and issues. With a chapter on the coursework unit, this study guide is invaluable for the whole A2 specification, not just the exam. "Study Guide for OCR Psychology: A2 Level" is endorsed by OCR and is ideal for use with the "Psychology in Practice" series. It is also of use with the Edexcel and AQA specifications, and valuable to students of sport, health and social care, and business studies, and anyone interested in applied psychology.
