How can a high school student find the perfect college for his or her interests, strengths, and personality? College Matchmaker, 2007 Edition is a comprehensive book of college lists designed to help students pinpoint their ideal colleges, and it's produced by the same experts behind the top-selling Best 361 Colleges .

Surveying thousands of undergraduates to provide a microscopic level of detail, lists include everything from academics and dorms to the best places for hang gliding or

studying animal nutrition. By consulting and cross-referencing lists, a student will be able to find that one perfect fit—for example, a liberal arts college with great study abroad opportunities, or a college offering a mythology major and a fantastic lacrosse team.
