著者:Rehkopf, Jeffrey (EDT)

出版者:Prentice Hall

出版时间:2004-11

装帧:Pap

isbn:9780130482051

This two book set-a Classroom Manual and a Workshop Manual-provides a current and deep technical discussion of engine rebuilding and repair. This revision, written by a new author, has greatly reorganized the Workshop manual to eliminate duplicate material and improve the correlation between the two books. Provides users with an excellent resource in preparation for ASE Certification tests. KEY TOPICS: In addition to the latest information about lubricants, engine design, and manufacturing, the books cover the following key topics: OSHA safety self-inspection worksheets; Engine parts,

operation, and construction; Engine physics and chemistry; cooling systems; intake and exhaust systems; Tools for engine rebuilding; Engine testing and diagnosis; Engine removal, disassembly, general inspection, and cleaning. MARKET: For auto mechanic professionals, those preparing for the ASE Certification Exam, or for use as a reference tool for those seeking a good foundation in theory and repair of engines.
