In this new book Colvin has managed to go beyond the Chevy books by including information such as Delco starters and radios. LOF glass codes, and year-by-year model changes. Restoring your Corvette to original factory specifications? You'll find the casting numbers that correspond to your car's Vehicle Identification Number to help you avoid buying the wrong parts. Buying a Corvette? You'll find how to tell if it really is a 'matching numbers' car. Interested in Corvette history? There are fascinating stories that explain everything from mid-year running changes to production idiosyncrasies. Whether you are new to the Corvette hobby or a 15-year Bloomington Gold judge, you can learn something new from Corvette by the Numbers(TM).
