isbn: 9780760307588

This follow-up to the MBI bestseller *Classic American Railroads* is a beautiful tribute to 15 additional railroads not included in the first volume. Focusing on the golden age of railroading between World War II and the early 1970s, this all-new book features the histories, locomotives, rolling stock, and memorabilia of railroads like the Delaware & Hudson; Erie Lackawanna; Gulf, Mobile & Ohio; St. Louis-San Francisco Railway; Maine Central; Nickel Plate Road; Southern Railway; Great Northern Railway; and others. Amazingly preserved color photography from the decades covered, along with archival black-and-white images, capture the legendary trains against scenic backdrops across

the nation, while period print ads and brochures add a nostalgic element to the stories behind the railroads' passenger and freight operations. Mike Schafer has written several rail-related books for MBI, including Streamliner Memories, Freight Train Cars, and Classic American Railroads.
