In this work, America's favourite young builder shares his secrets. Billy Lane is the

fastest-rising star among the high-profile custom chopper builders, and in this book he offers many of his secrets for building a chopper that will stand out in a crowd. This is the ultimate resource for any chopper builder - a book designed as a step-by-step guide to building any type of custom motorcycle. This book also covers custom-building beyond the chopper genre, including the building of "bobbers," an old-school style of custom that has been revived as a hot trend. Pre-dating choppers, they are on the cutting edge of current biker "cool," for real riding, and are much safer and more functional than choppers.
