装帧:Pap

isbn:9781857802368

This latest "Red Star" volume is typical of what the series does best. This is a detailed survey of the jet-powered flying boats, produced by the Beriev design bureau. Established as long ago as the 1930s, Beriev is one of the less well known of the Soviet

design bureaux. The organisation is still active as an aircraft design and manufacturing business today. Its particular forte lay in the development of flying boats.
