Pilots learn to speak effectively and efficiently -- and take the stress out of communications -- during flights in the Instrument Flight Rules (IFR) or the Visual Flight Rules (VFR) environment with these instructional guides. Whether used as a training tool and memory aid on the ground or as speaking notes in the cockpit, these 32 script templates and accompanying instructions take the guesswork out of what to say to whom and when. Versatile enough to accommodate any IFR or VFR flight, regardless of the complexity or number of communications required, the templates are perforated and designed to fit perfectly on a knee board. Each script is structured around a different type of radio communication that may be needed in-flight and multiple copies of each template are included to support student pilots through several cross-country flights and practice sessions.
