Famous for its role in the Transcontinental Railroad, Union Pacific is Americas oldest- and the worlds largest- railway, serving two-thirds of the United States for a century and a half. This retrospective spans the UPs entire history from 1862 to present,

detailing key personalities, depots and terminals, locomotives, trains, rolling stock, and memorabilia. Modern and period color photography, along with archival photos, make this an ideal reference for UP enthusiasts and modelers alike. Some of Brian Solomons MBI train titles include American Steam Locomotive and the American Diesel Locomotive, and this seasons Super Steam Locomotives. He lives in Munson, Massachusetts.
