Job guru Richard Fein, author of numerous interview books and articles, now offers his expertise to the over-55 set. According to a survey by the AARP, seven out of ten workers that are 45 and older plan to work during the retirement years. People are living longer than ever, and many are finding that retiring in their 50s or 60s leaves them feeling restless and may even leave them without enough money to maintain their accustomed lifestyle. For a variety of reasons, more and more people are finding themselves in the workplace at an advanced age and facing a new set of circumstances. The Baby Boomer's Guide to the New Workplace is an upbeat, yet realistic, book for people who plan to work during their senior years. It is a book about the reasons people work, the choices they make, what they enjoy, what they don't, and the techniques everyone needs to know to land the right job.
