BABY SLEEPYTIME

A book of classic nursery rhymes packaged with a CD that provides sonic sleep rhythms and soothing ocean sounds to gently lull your baby into the peaceful land of dreams. Guaranteed!

As every new parent knows, getting your baby to sleep can be a daunting task. Baby Sleepytime combines a book of delightful nursery rhymes that you read to your child as you play the hour-long CD that is scientifically designed to help you and your baby go to sleep faster and stay asleep longer.

Baby Sleepytime is a breakthrough advancement in sleep technology. Employing Independent Binaural Beat Sound Technology, the CD is so effective that you won't spend another sleepless night soothing your crying baby. Baby Sleepytime uses the power of binaural beats to induce the Frequency Following Response (FFR). Well-known to scientists since the 1930s, binaural beats and FFR were the subject of an article in Scientific American in 1973 that led to many new discoveries into brainwave effects.

AV technologist Christopher Oliver has built on these discoveries to create a unique and powerful dual binaural beat technology. He recorded and mixed multiple tracks of ocean waves from the Gulf of Mexico at Padre Island, blending them to produce a backdrop on which he layered multi-track, sleep-inducing brainwave sounds. The result is the most effective sleep CD ever. It even works for adults. Completely safe and very effective, Baby Sleepytime means no more crying and tears at bedtime for babies and no more sleepless nights for parents. Guaranteed!
